EVERY TIME**

**THE GOLD
STANDARD**

TAPETECH® DRYWALL FINISHING TOOLS

In today's highly competitive workplace we have to work smart. The proper tools will help do just that by completing jobs faster and easier. That's exactly what TapeTech's Automatic Taping and Finishing (ATF) Tools are designed to do. When you use TapeTech Tools, not only will you complete jobs in record time, the work will be high quality every time.

WHY SHOULD YOU USE ATF TOOLS?

INCREASED PRODUCTIVITY

ATF Tools help you finish drywall faster – up to 50% faster than with taping knives, pans and hawks.
Completing the job faster means more profit and the opportunity to win more jobs.

BETTER FINISH

ATF Tools are designed and calibrated to apply the proper amount of joint compound for a better finish. ATF Tools simultaneously finish both sides of the joint requiring very little, if any sanding.
A superior finish means more satisfied customers.

CONSISTENT RESULTS

ATF Tools ensure that you get the same high quality results every time.
Consistent results on every wall will result in fewer call backs and more profit.

ENHANCED SAFETY

By using tools that can complete most of the work in a standard room without stilts or scaffolding,
ATF Tools contribute to a much safer jobsite.

 Look for the 'T' icon for exclusive TapeTech products.

TAPING

"The Smoothest Tapers in the Industry"

04TT - EasyClean™ Automatic Taper

05TT - Automatic Taper

Integrated flanges provide positive, ergonomic grip when cutting or advancing tape, reducing user fatigue.

Longer Control Tube makes it easier to cut tape when working on higher ceilings.

"Twist-off" removal for easy cable and plunger access. Provides comfortable hand grip for better control and steering. Superior protection for end of tube.

Enclosed Rollers provide smoother operation and protect hands.

Attached "Keeper" speeds changing of tape rolls and prevents loss of Keeper.

Features

Simultaneously applies tape and correct amount of joint compound

- Stainless steel and gold anodized aluminum for lightweight, durability
- Reaches 10' (3m) ceilings without the need for benches, scaffolding
- Smoothest operating automatic taper available

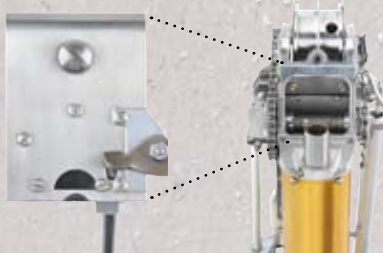

Specifications

Empty Weight	6.25 lbs
Full Weight*	16.7 lbs
Coverage (approximate)	78' per load

*Full weight includes a 250' roll of tape.

INNOVATION Model 04TT EasyClean™ Taper

The 04TT Taper features a cover plate that can be removed with one simple screw. This allows quick access for improved cleaning or maintenance.

Our engineers are constantly designing new tools and improving existing tools to make your job easier.

15TTE - Inside Corner Roller (HR Handle Included)

Used immediately after the Automatic Taper, the stainless steel rollers firmly embed the tape into the corner in preparation for the corner finisher.

HRRE - Extendable Corner Roller Handle Also Available

17TTE - Outside Corner Roller (HR Handle Included)

Used to force out excess compound and firmly embed outside corner bead, especially paper-faced bead.

HRRE - Extendable Corner Roller Handle Also Available

40TT - 2" Corner Finisher (use with HF Handle - Not Included)

Used after the Corner Roller to bed the tape into the inside corner joints and remove excess compound in one pass. The corner finisher leaves feathered edges on both sides of the internal corner joint.

HFRE - Extendable Corner Finisher Handle Also Available

FINISHING

50TT - 7" Corner Applicator 35TT - 8" Corner Applicator

The Corner Applicators supply joint compound to Corner Finishers and Mud Heads. They feature a stainless steel cone for long life.

- Attaches securely to Corner Finishers and Mud Heads
- Ball joint allows flexible positioning of attachment
- Safely reaches high angles from the floor

HA Handle Included

40TT - 2" Corner Finisher 45TT - 3" Corner Finisher

Used with the MudRunner® or Corner Applicator to apply joint compound to internal corners, finishing both sides in a single pass. These sizes are generally used on the first finish application.

- Stainless Steel frames
- TapeTech® exclusive positive ball retainer
- Spring loaded action compensates for imperfect angles

Use with HF or HFRE Handles – Not Included

48TT - 3" EasyRoll™ Adjustable Corner Finisher 48XTT - 3½" EasyRoll™ Adjustable Corner Finisher

Used with the MudRunner® or Corner Applicator to apply joint compound to internal corners, finishing both sides in a single pass. These sizes are generally used on the second finish application.

- EasyRoll™ wheels for the smoothest action on the wall
- Stainless Steel frames
- TapeTech exclusive positive ball retainer
- Spring loaded action compensates for imperfect angles

Use with HF or HFRE Handles – Not Included

INNOVATION Model 14TT MudRunner®

Holds 50% more compound than a standard 8" Corner Applicator and 70% more than the 7" Applicator.

The MudRunner® is the next generation of Corner Applicators. A simple twist of the handle applies compound effortlessly with Corner Finishers or Mud Heads.

Our engineers are constantly designing new tools and improving existing tools to make your job easier.

63TT - 2" Nail Spotter 68TT - 3" Nail Spotter

Nail Spotters fill the impressions left by fastener heads, removing the excess compound at the same time. Use the 2" for the first application and the 3" for the second or third application.

- Fills an entire row of fastener impressions in one pass
- Rugged, stainless steel construction
- Uses a skid instead of wheels to extend blade life

HN Handle Included; HNRE Handle Also Available

20TTX - 7" Flat Box
25TTX - 10" Flat Box
30TTX - 12" Flat Box

TapeTech® Flat boxes consistently dispense the proper amount of joint compound and feather both edges in one pass.

- Anodized aluminum box
- Hardened steel blade with brass blade holder and adjustable crown settings
- Pivoting axle helps to compensate for uneven walls

22TT - 7" EasyClean™ Box
27TT - 10" EasyClean™ Box
32TT - 12" EasyClean™ Box

EasyClean™ boxes consistently dispense the proper amount of joint compound and feather both edges in one pass. They feature increased capacity and an easy-to-remove pressure plate for easy cleaning, even with setting compounds.

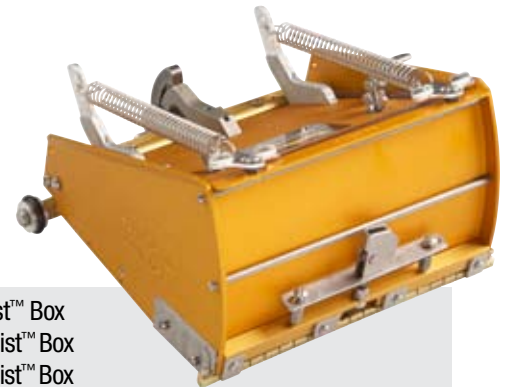

- EasyClean™ design
- Anodized aluminum box
- Hardened steel blade with brass blade holder and adjustable crown settings
- Pivoting axle helps to compensate for uneven walls

24TT - 7" Power Assist™ Box
28TT - 10" Power Assist™ Box
33TT - 12" Power Assist™ Box

TapeTech exclusive Power Assist™ boxes consistently dispense the proper amount of joint compound and feather both edges in one pass with 50% less effort required. They feature the EasyClean™ design for efficient cleaning, even with setting compounds.

- Reverse springs for power assisted finishing and EasyClean™ design
- Anodized aluminum box
- Hardened steel blade with brass blade holder and adjustable crown settings
- Pivoting axle helps to compensate for uneven walls

HANDLES

8034TT - 34" Box Handle **8042TT** - 42" Box Handle
8054TT - 54" Box Handle **8072TT** - 72" Box Handle

Securely attaches to the TapeTech® Flat, EasyClean™ or Power Assist™ finishing boxes for superior control and finishing.

- Brake design makes it easy to operate finishing boxes
- Adjustable grip

8134TT - 34" EasyFinish® Handle **8142TT** - 42" EasyFinish® Handle
8154TT - 54" EasyFinish® Handle **8172TT** - 72" EasyFinish® Handle

Securely attaches to the TapeTech Flat, EasyClean™ or Power Assist™ finishing boxes for superior control and finishing. The ergonomic bent handle design provides increased leverage when working overhead and helps to activate the Power Assist™ mechanism.

- Brake design makes it easy to operate finishing boxes
- Adjustable grip

88TTE - Box XTender™ Handle

Provides flexible reach when using TapeTech Flat, EasyClean™ or Power Assist™ finishing boxes.

- Longest extendable box handle – from 41" (1.04m) to 63" (1.60m)
- Strongest extendable box handle in the industry
- Adjustable brake grip to fit any size hand

HNRE - Extension Handle

Extends for greater reach with TapeTech Nail Spotters.

HRRE - Extension Handle

Extends for greater reach with TapeTech Corner Rollers.

HFRE - Extension Handle

Extends for greater reach with TapeTech Corner Finishers.

REK1 - Extension Handle Set (*HNRE, HRRE, HFRE*)

REK2 - Extension Handle Set (*HRRE, HFRE*)

HN - Fiberglass Handle

Support Handle designed to work with the TapeTech Nail Spotters.

HR - Fiberglass Handle

Support Handle designed to work with the TapeTech Corner Roller.

HF - Fiberglass Handle

Support Handle designed to work with the TapeTech Corner Finishers.

HA - Fiberglass Handle

Support Handle designed to work with the TapeTech Corner Applicators.

PUMPS & ADAPTERS

72TT - EasyClean™ Pump

Quickly fills your TapeTech® tools with joint compound (with 90T and 85T adapters).

- EasyClean™ design with removable tube makes maintenance and cleaning easy
- Low friction components for increased suction
- Includes coarse and fine screens
- Gold anodized for durability

85T - Gooseneck B89TT - Gooseneck

Attaches to TapeTech pumps to fill Automatic Tapers 04TT and 05TT.

- 85T attaches to 72TT Pump
- B89TT features tool-less attachment to the B74TT Pump

90T - Filler Adapter

Used to fill Flat, EasyClean™ and Power Assist™ finishing boxes, Nail Spotters, Corner Applicators and the MudRunner®.

- Attaches to TapeTech 72TT Pump

INNOVATION

Model B74TT BAZOOKA® Pump

The B74TT BAZOOKA Pump fills tools up to 40% faster! It features a larger footplate for increased stability, integrated carry handle, neoprene covered pump handle and larger diameter tube with quick release clamps and twist-off base for the easiest cleaning of any pump in the industry.

Filler Adapter Included

Our engineers are constantly designing new tools and improving existing tools to make your job easier.

MUD HEADS

Mud Heads apply compound to inside or outside corners for use with paper-faced tapes and beads. Use with the MudRunner® or standard Corner Applicators.

16TT - Outside Corner

16TT90 - Inside Corner

YOUR GUIDE TO THE PERFECT WALL.

1 WALL PREP

Mix Joint Compound > **Cover Fasteners** [63TT with HN Handle]

2 TAPING

Tape Butt and Tapered Joints [04TT or 05TT Taper, Pump, Gooseneck] > Wipe Down Joints >

Tape Internal Corners [04TT or 05TT Taper, Pump, Gooseneck] > **Embed Internal Corners** [15TTE Corner Roller] >

Wipe and Embed Internal Corners [40TT or 45TT Corner Finisher & HF Handle] >

Install Paper-faced Bead [16TT w/ MudRunner® or 35TT/ 50TT plus 17TTE] > or Embed Corner Bead

3 1st COAT APPLICATION

Coat Butt and Tapered Joints [7" or 10" Finishing Box, Pump, Filler Adapter] > Detail Intersections >

Coat Standard or Paper-faced Bead > **Coat Fasteners** [68TT with HN Handle]
